

WHAT IS CLAIMED IS:

1. A mobile station, comprising:

transmitting means for transmitting a signal; and

5 transmission power limit setting means for setting  
a transmission power limit based on a shape of said mobile  
station,

wherein said transmitting means transmits the  
signal in accordance with the transmission power limit set  
10 by said transmission power limit setting means.

2. The mobile station as claimed in claim 1, wherein  
said transmission power limit setting means sets the  
transmission power limit either for voice communication  
15 or for moving image communication.

3. A mobile station, comprising:

transmitting means for transmitting a signal; and

20 transmission power limit setting means for setting  
a transmission power limit based on whether or not an  
external device is connected to said mobile station,

wherein said transmitting means transmits the  
signal in accordance with the transmission power limit set  
by said transmission power limit setting means.

25

4. The mobile station as claimed in claim 3, wherein said external device is one of an external camera, a personal computer, a viewer, and a PDA.

5 5. The mobile station as claimed in claim 3, wherein said transmission power limit setting means sets the transmission power limit either for voice communication or for moving image communication.

10 6. A mobile station, comprising:  
transmitting means for transmitting a signal; and  
transmission power limit setting means for setting  
a transmission power limit based on whether or not an  
external device is connected to said mobile station, and  
15 a shape of said mobile station and/or a shape of said  
external device,

wherein said transmitting means transmits the  
signal in accordance with the transmission power limit set  
by said transmission power limit setting means.

20

7. The mobile station as claimed in claim 6, wherein said external device is one of an external camera, a personal computer, a viewer, and a PDA.

25 8. The mobile station as claimed in claim 6, wherein said transmission power limit setting means sets the

10057343.012462

transmission power limit either for voice communication  
or for moving image communication.

9. A communication system, comprising:

5 a mobile station and an external device connectable  
to said mobile station,

wherein said mobile station comprises,

transmitting means for transmitting a signal,

and

10 transmission power limit setting means for  
setting a transmission power limit based on a shape of said  
mobile station, and

wherein said transmitting means transmits the  
signal in accordance with the transmission power limit set  
15 by said transmission power limit setting means.

10. A communication system, comprising:

a mobile station and an external device connectable  
to said mobile station,

20 wherein said mobile station comprises,

transmitting means for transmitting a signal,

and

transmission power limit setting means for  
setting a transmission power limit based on whether or not  
25 an external device is connected to said mobile station,  
and

wherein said transmitting means transmits the signal in accordance with the transmission power limit set by said transmission power limit setting means.

5 11. A communication system, comprising:

a mobile station and an external device connectable to said mobile station,

wherein said mobile station comprises,

transmitting means for transmitting a signal,

10 and

transmission power limit setting means for setting a transmission power limit based on whether or not an external device is connected to said mobile station and a shape of said mobile station and/or a shape of said

15 external device, and

wherein said transmitting means transmits the signal in accordance with the transmission power limit set by said transmission power limit setting means.

20 12. A transmission method for transmitting a signal at a mobile station, comprising the steps of:

setting a transmission power limit based on a shape of said mobile station; and

25 transmitting the signal in accordance with the set transmission power limit.

10057343.012402  
204270 E4E7500T

13. The transmission method as claimed in claim 12, wherein said step of setting the transmission power limit sets the transmission power limit either for voice communication or for moving image communication.

5

14. A transmission method for transmitting a signal at a mobile station, comprising the steps of:

setting a transmission power limit based on whether or not an external device is connected to said mobile station; and

transmitting the signal in accordance with the set transmission power limit.

15. The transmission method as claimed in claim 14, wherein said external device is one of an external camera, a personal computer, a viewer, and a PDA.

16. The transmission method as claimed in claim 14, wherein said step of setting the transmission power limit sets the transmission power limit either for voice communication or for moving image communication.

17. A transmission method for transmitting a signal at a mobile station, comprising the steps of:

setting a transmission power limit based on whether or not an external device is connected to said mobile

station, and a shape of said mobile station and/or a shape of said external device; and

transmitting the signal in accordance with the set transmission power limit.

5

18. The transmission method as claimed in claim 17, wherein said external device is one of an external camera, a personal computer, a viewer, and a PDA.

10 19. The transmission method as claimed in claim 17, wherein said step of setting the transmission power limit sets the transmission power limit either for voice communication or for moving image communication.
